## Internships

---

Web Developer	AK Infopark, Kanyakumari
Java Developer	Srishti Innovative, Trivandrum

## Projects Experience

---

### 1. Students Fee Tracker Application

Developed a Students Fee Tracker Application using Java and SQLite to manage fee payments and student records effectively. Created user-friendly interfaces for seamless navigation and enhanced user experience. Implemented SQLite for robust database management, ensuring efficient data retrieval and reporting. It is mainly used for students and parent. CRUD operation is used for Create, Read, Update and Delete. This application I can calculate Tuition Fees, Van Fees, Exam Fees. This overall project can be done by using Android Studio .

### 2. Dynamic E-commerce Website Using React.js

Developed a user-friendly React e-commerce application with dynamic and interactive interfaces. Used HTML5 for structuring content, CSS3 with Bootstrap5 for styling. Then React Router for dynamic navigation, Context API for efficient data management, and Axios for API requests enabling authentication. Product id name can be store in json server. Finally CRUD operations also used.

## Soft Skills
